Arabic	Native

Transferable Skills

Problem Solving · Teamwork

Education

EPITECH Paris - Academic Exchange — Sep. - Dec. 2026

Computer science studies as part of the EMSI program.

EMSI — Since 2024

Moroccan School of Engineering

Computer engineering studies - Casablanca, Morocco.

Cybersecurity Training — Nov. 2023 - Apr. 2024

Six-month training program.

Baccalaureate — 2023

Physics and Chemistry.

Technical Skills

Programming : Python and C - fundamentals and academic projects.

Web Development : HTML, CSS; basic JavaScript.

Databases : SQL and query writing.

Tools : Git, GitHub, Visual Studio Code.

Cybersecurity : Network security, system security and intrusion detection fundamentals.

Systems : Linux/Ubuntu, WSL, Bash commands; basic knowledge of memory and processes.

Personal and Academic Projects

Personal Portfolio — HTML / CSS / JavaScript

Built pages to present my background and projects, with navigation and animations.

Hangman Game — Python / Pygame

Console and graphical versions with letter input, attempt tracking and result display.

Caesar and Vigenère Ciphers — Python

Encryption scripts handling shifts, keys and characters.

Data Structures — C

Implemented stacks and linked lists.

Snort - Network Intrusion Detection — Snort / Linux / TCP/IP

Configured Snort and custom rules to detect suspicious network traffic in a security lab.

Smart Parking System - Arduino — Arduino Uno / C/C++ / Sensors

Built an automated parking system with ultrasonic vehicle detection, a servo-controlled entrance barrier and an I2C LCD displaying available spaces.
